

The line plot evidenced the number of COVID-19 cases by time from 2020-2022. A Line plot is a good way to compare time trends.

The plot reveals that the USA is the leading country in the number of COVID-19 cases followed by India and Brazil.

The bar plot shows the number of COVID-19 deaths by country. I chose a bar chart because it is a good way to compare the distribution by country.

The chart allows us to see that the USA has the largest number of covid deaths, followed by Brazil and India.

The box plot shows the percentage of people fully vaccinated in three continents. I chose a box plot chart because it is a good way to compare median. The chart enables us to see that Europe and North America countries have a median percentage of fully vaccinated population around 75% while Africa has a median about 50%.
